

# CHIPILIN

## Massachusetts grown

Chipilín is a leguminous plant that is used as an herb in Central America and Southern Mexico. It is a perennial that can be grown as an annual in temperate climates.

Chipilín is used in soups and in making the corn dough for *pupusas*, a type of tortilla popular in Central America.

"State funds for this project were matched with Federal funds under the Federal-State Marketing Improvement Program of the Agricultural Marketing Service, U.S. Department of Agriculture."
